

MITRE ATT&CK; Research Internship – Group Leader Selection Program

MITRE ATT&CK; Research Internship – Group Leader Selection Program

Objective:

This project is being conducted to identify and select 10–18 potential Group Leaders based on technical research capability, analytical thinking, consistency, leadership potential, and professional reporting standards.

Research Platform:

<https://attack.mitre.org/>

Intern ID Range:

2100 – 2199

Task Allocation Logic:

- Campaign assignment will follow the last two digits of the Intern ID.
- Software assignment will follow corresponding software number ranges.

Example:

Intern ID: 2121

- Assigned Campaign: Campaign No. 21
- Assigned Software Range: 210 – 220

Each intern must research:

- 1 Assigned Campaign
- 10 Assigned Software entries/tools/malware

Submission Deadline:

15 May 2026

Evaluation Criteria:

- Technical Accuracy
- MITRE ATT&CK; Mapping
- Threat Intelligence Understanding
- Research Quality
- Documentation Standards
- Investigation Capability
- Consistency & Discipline
- Communication & Leadership Potential

Mandatory Research Areas

1. Campaign Research

- Campaign Overview
- Threat Actor/Group Association
- Timeline
- Objectives of Attack
- Targeted Sectors/Countries
- Attack Flow
- MITRE ATT&CK; Techniques Used
- Real-world Incidents
- Detection Opportunities
- Defensive Recommendations

2. Software Research (10 Assigned Software Entries)

For each assigned software/tool/malware:

- Name & Type
- Description
- Threat Actor Association
- Supported Platforms
- ATT&CK; Techniques Used
- Execution Method
- Persistence Techniques
- Privilege Escalation
- Defense Evasion
- Credential Access
- Discovery Techniques
- Lateral Movement
- Command & Control
- Exfiltration
- Impact Analysis
- Indicators of Compromise (IOCs)
- Detection & Mitigation
- References & Sources

Research Requirements:

- Use official MITRE ATT&CK; references wherever applicable.
- Mention ATT&CK; Technique IDs (Example: T1059, T1547).
- Maintain proper technical and professional documentation standards.
- Avoid plagiarism and low-quality copied summaries.
- Include screenshots, attack chains, diagrams, or workflows wherever relevant.
- Research should demonstrate understanding and analysis capability.

Submission Format:

- PDF or DOCX
- Proper headings and formatting
- Mention Intern ID clearly
- Mention assigned Campaign and Software Range clearly
- Structured reporting methodology is mandatory

Selection Goal:

This initiative is designed to identify interns capable of:

- Leading technical teams
- Conducting cyber threat intelligence operations
- Managing cybersecurity research projects
- Producing professional-grade intelligence reports
- Coordinating technical investigations

Cybersecurity leadership is not measured by who posts the most motivational “hack the planet” quotes online. Real capability appears through discipline, technical depth, research quality, and the ability to understand adversary behavior under real-world conditions.
